AI IN HEALTH CARE

By Shikha Verma, Aman Kumar, Vaishnav Tammadwar

"If you have life, you have the world".

Healthcare sector is totally different from other industry. It is on high priority sector and people expect highest level of care and services regardless of cost. Major disease areas that use AI tools include cancer, neurology and cardiology.AI can be applied to various types of healthcare data (structured and unstructured). Popular AI techniques include machine learning methods for structured data, such as the classical support vector machine and neural network, and the modern deep learning, as well as natural language processing for unstructured data.
